1 INTRODUCTION

This document is the instruction manual of the Electronic Application system Monitoring and Control of intra-Community movement of products subject to excise duty (energy, tobacco and alcoholic products) under suspension of taxes.

The key element of EMCS system is the electronic submission of the Administrative Document (Electronic Document Management e-AAD), which will replace the existing accompanying document on paper.

This system will allow Member States to monitor in real time the movement of goods under Excise Duty and to carry out the necessary checks, simplifying procedures with a goal to improve the functioning of the internal market, ensure collection of the tax rates set by Member States and reduce the risk of fraud in this area.

The manual will not describe the business logic of the system but will contain detailed instructions for the end user to carry out all functions of the system.

1.1 Overview

Entities Message and Movement are the main concepts of the application. A movement may contain multiple messages, but a message can only be in one movement (or none, if the messages are intra-custom messages and are not sent to an economic operator).

The Message entity is essentially a digital version of the document. For example, typical messages of a movement are:

- Submission of an IE815 Message (Creation of New Movement)
- Submission of an IE819 Message (Alert or rejection of an e-AD)
- Submission of an IE810 Message (Cancellation of an e-AD by the Consignor)
- Submission of an IE818 Message (Submission of Report of Receipt)
- Submission of an IE819 Message (Submission of Alert or Reject Message)
- Submission of an IE813 Message (Change of Destination)
- Submission of an IE825 Message (Splitting Operation)
- Submission of an IE871 Message (Explanation on Delay)
- Submission of IE837 Message (Explanation of delay for delivery)
- Generation of IE802-TIM_AAD Timer (Reminder at expiry of time limit for Report of Receipt)
- Generation of IE802 -TIM_CHS Timer (Reminder at expiry time for change of destination)
- Generation of IE802 -TIM_FDF Timer (Reminder at expiry of time limit for update of destination fields)

By submitting the IE815 message a new movement is created, for which the operator can create new messages. The Movement (and also Messages) incorporates the concepts of sender and the recipient. The term Sender of Movement means the Consignor of the goods and the term Recipient of Movement means the recipient of the goods (Consignee). The sender is the originator of the message regardless of the fact that this movement may not have begun by him. This means that, for example in the case of IE818 (Delivery Report) the sender of the message is actually the recipient of the Movement. Therefore the messages characterized as outgoing (if sent from our system to another entity (office or financial institution)) or incoming (if received by our system (from an office or other financial institution)). Hence, the IE815 message which in fact is the draft e-AAD „initiates” an outgoing movement.

1.2 Minimum System Requirements

- One of the following browsers must be installed
 - Mozilla Firefox 2.xx/3.xx
 - Opera 9.xx
 - Internet Explorer 6/7
 - Safari 3.xx
- Minimum screen resolution 1024x768
- JavaScript must be enabled
- Cookies must be enabled
- A PDF reader must be installed (for printing documents)

1.3 Conventions

- Fonts
 - When using the following font Username, then the corresponding element refers to an element of an application form.
- Terminology
 - Console: As Console in this manual is mentioned the left part of the application where all the functions for each user are.
- Screens
 - In all screens of the application, the required fields are colored in yellow
 - In case of wrong input (e.g. invalid date), the field is highlighted in red
- Search Criteria
 - All search criteria are optional. They can be partially filled. (E.g., if the EO Full Name search field is filled with "Papa", then the results will have all the records which contain this diction.

2. LIST OF INTERFACES FOR ECONOMIC OPERATORS

2.1 Login

The login screen appears in case that an Economic Operator owns more than one excise numbers.

In this case the license should be selected in order to enter the EMCS system.

The system checks the validity of user data and opens the Economics' Operator console.

Click *Select a License* to continue to the functions of the system.

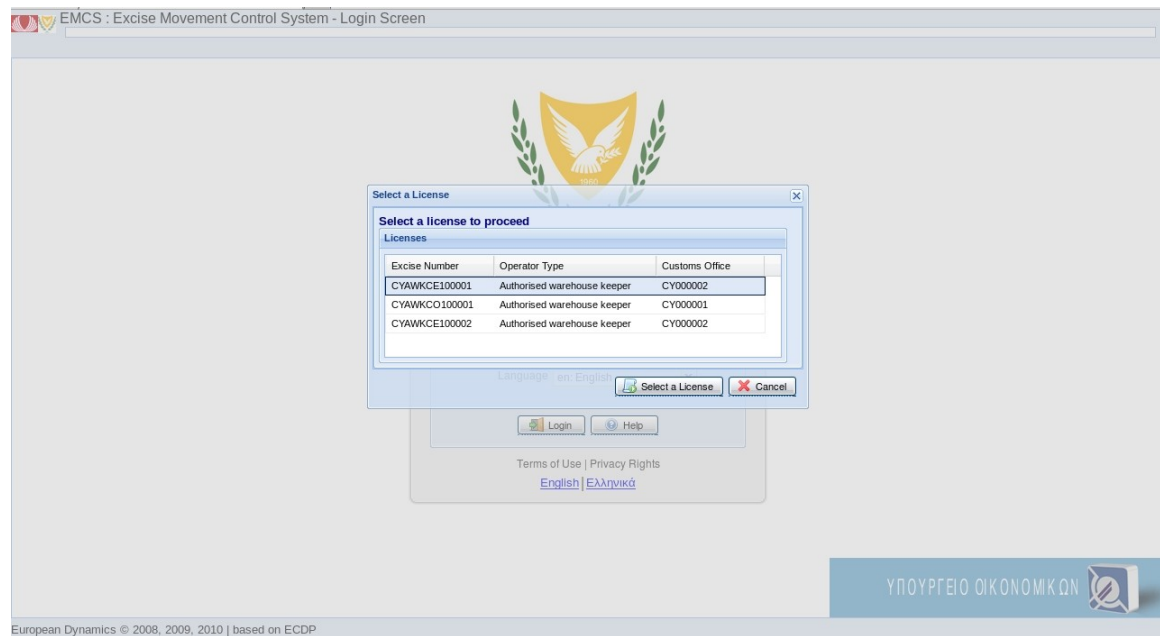

Figure 1 Screen User Login

2.2 Overview

After the successful login, Messages Overview screen appears. This screen is also displayed by selecting the Overview console.

Click *Overview* in the console to navigate to the following three tabs:

Messages Overview

Movements Overview

Pending Actions

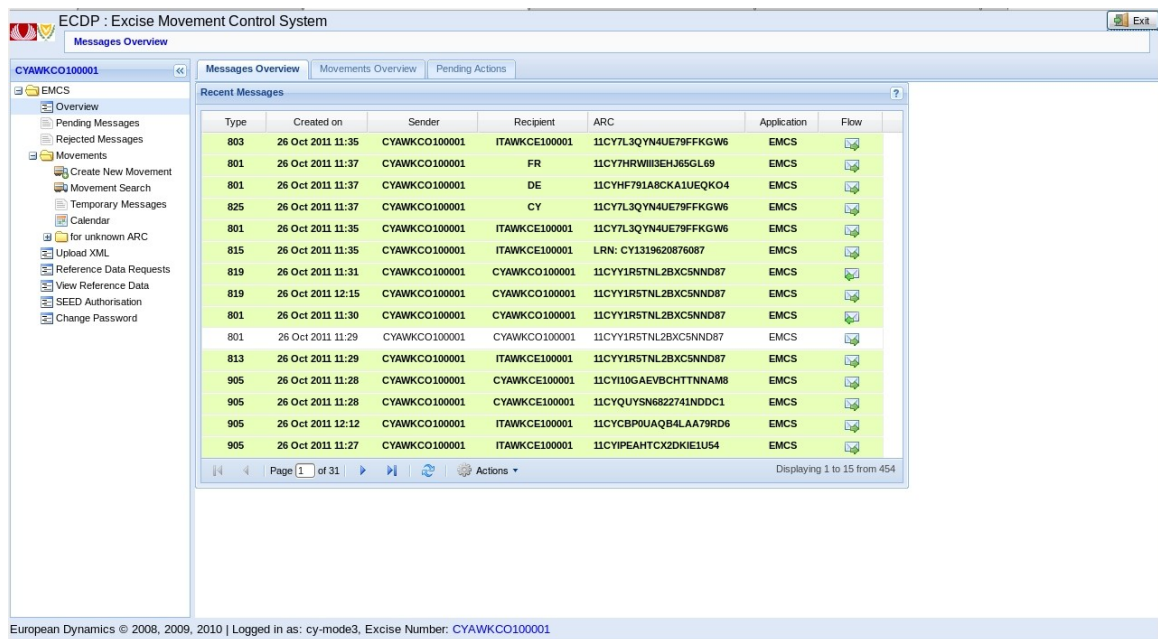

Figure 2 Screen Overview

2.2.1 Messages Overview

In screen Messages Overview appear all messages concerning the user. The messages list contains the messages sent by the user and the messages received by him. The messages sent by that user are all marked with an "Outbound Flow" while messages received are marked with an "Incoming Flow".

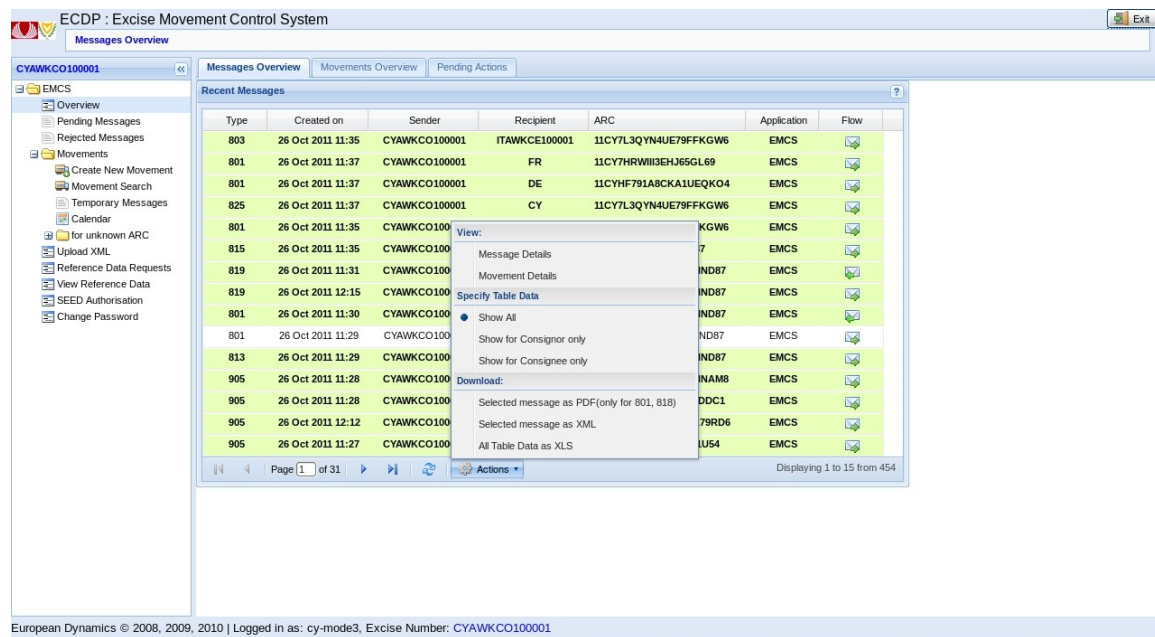

Figure 3 Screen Messages Overview

By choosing *Actions* the user has the following options

- View: *Message details*
- View: *Movement Details*
- Specify Table Data: *Show All*, to display all user messages
- Specify Table Data: *Show for Consignor only*, to display the movements of the user as Consignor
- Specify Table Data: *Show for Consignee only*, to display the movements of the user as Consignee
- Download: *Selected message as PDF (only for 801, 818)*
- Download: *Selected message as XML*
- Download: *All Table Data as XLS*, storing the display data in a file browser

2.2.2 Movements Overview

The second tab is the tab Movements Overview showing all movements on the user.

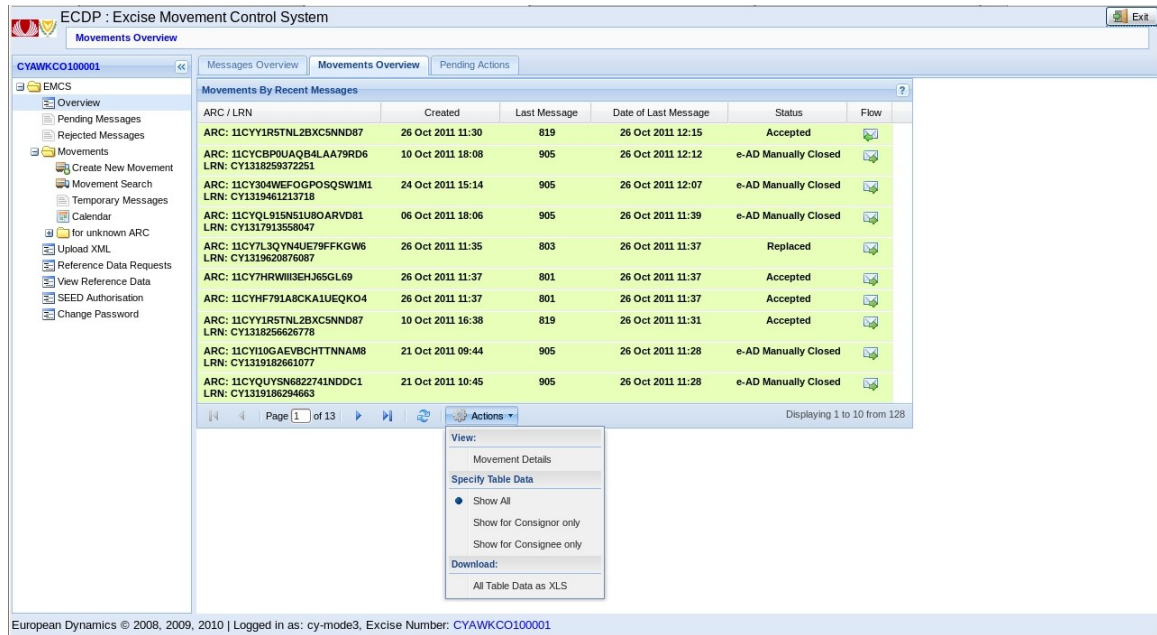

Figure 4 Screen Movements Overview

By choosing *Actions* user has the following options:

- View: *Movement Details*
- Specify Table Data: *Show All*, to display all movements of the user
- Specify Table Data: *Show for Consignor only*, to display the movements of the user as Consignor
- Specify Table Data: *Show for Consignee only*, to display the movements of the user as Consignee
- Download : *All Table Data as XLS*, storing the display data in a file browser

2.2.3 Pending Actions

The third tab of the Overview, *Pending Actions* is showing reminders - timers regarding the movements of the user.

Click *View Movement* to see the movement to which the reminder refers.

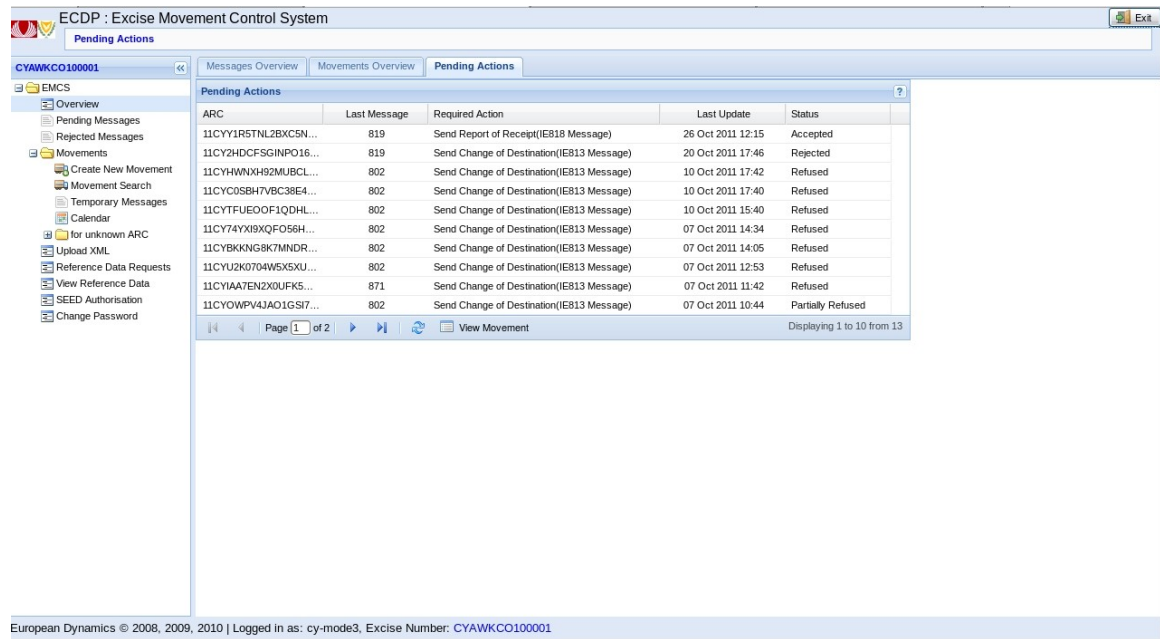

Figure 5 Screen Pending Actions

2.3 Pending Messages

Pending messages grid consists of messages that remain pending due to the unavailability of *Theseas* subsystem to respond.

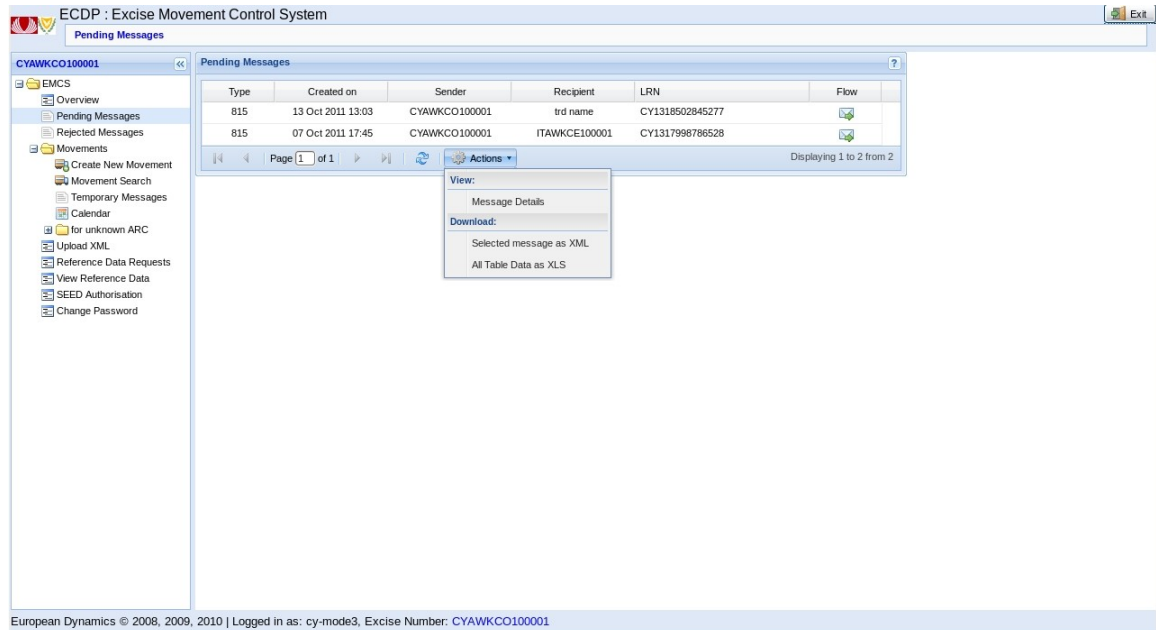

Figure 6 Screen Pending Messages

By choosing *Actions* user has the following options:

- View: *Message Details*
- Download: *Selected message as XML*
- Download : *All Table Data as XLS*, storing the display data in a file browser

2.4 Rejected Messages

Rejected messages grid consists of rejected messages caused by *Theseas* subsystem.

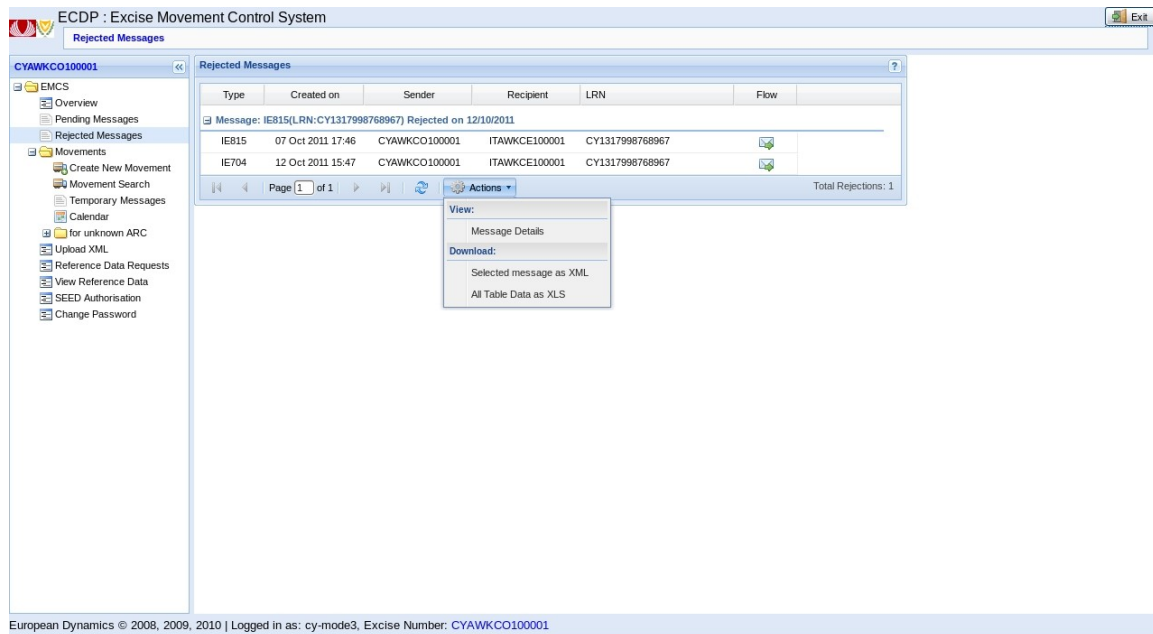

Figure 7 Screen Rejected Messages

By choosing *Actions* user has the following options:

- View: *Message Details*
- Download: *Selected message as XML*
- Download : *All Table Data as XLS*, storing the display data in a file browser

2.5 Movement Search

Click *Search Movements* in the console to display movements providing if necessary specific criteria:

- *Show*: specify the frame size results
- *Status*: state of motion (e.g., cancelled)
- *Group by*: sets the display order of results

Click *Detailed criteria* for additional criteria:

- *ARC*
- *Sender* (Excise Number)
- *Recipient* (Excise Number)
- *Start Date* (From/To)
- *Date of last Message* (From/To)
-

Click *Search* to display the results. After selecting an element of the grid *Movement Selection Results*, click *Details* to view details of the movement.

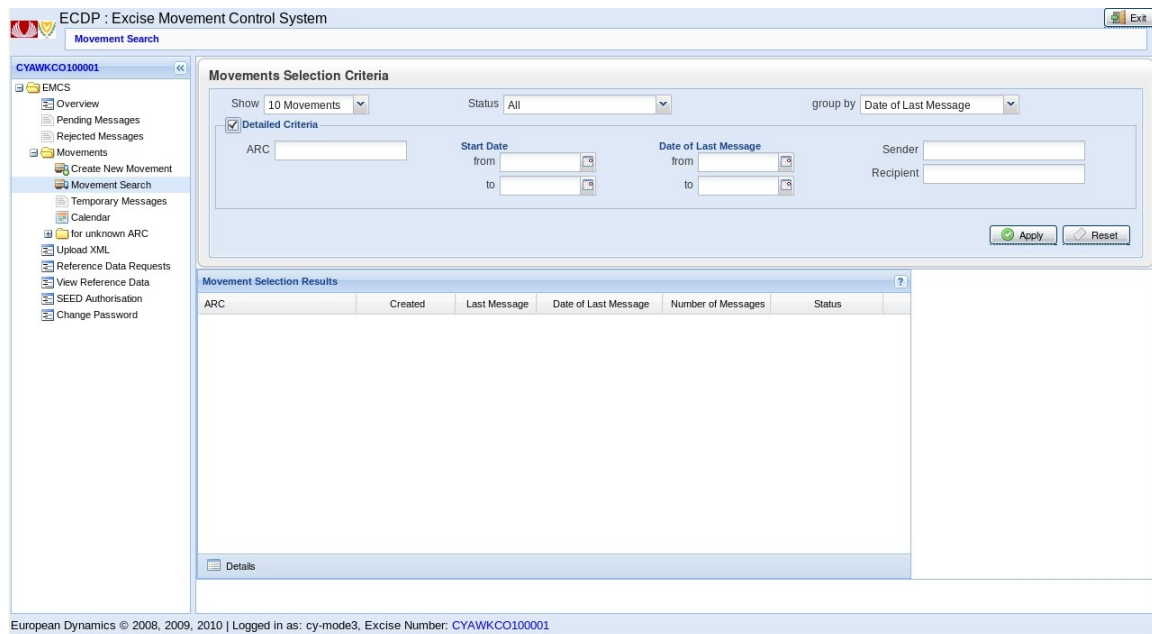

Figure 8 Screen Movement Search

2.5.1 View Movement

To view the details movements on a screen (e.g. Overview Movements or a search Movements) double click traffic form the grid.

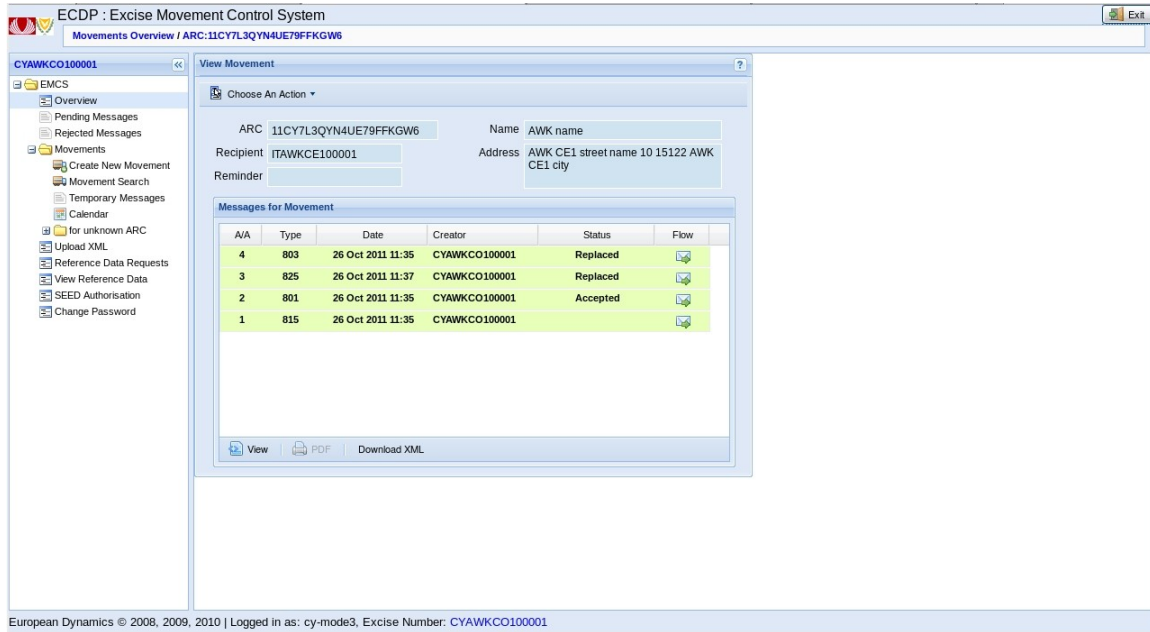

Figure 9 Screen View Movement Details

2.5.2 View Message

To view the details of a message on any screen (e.g. Overview Message View details or Movement) double click the message from the grid.

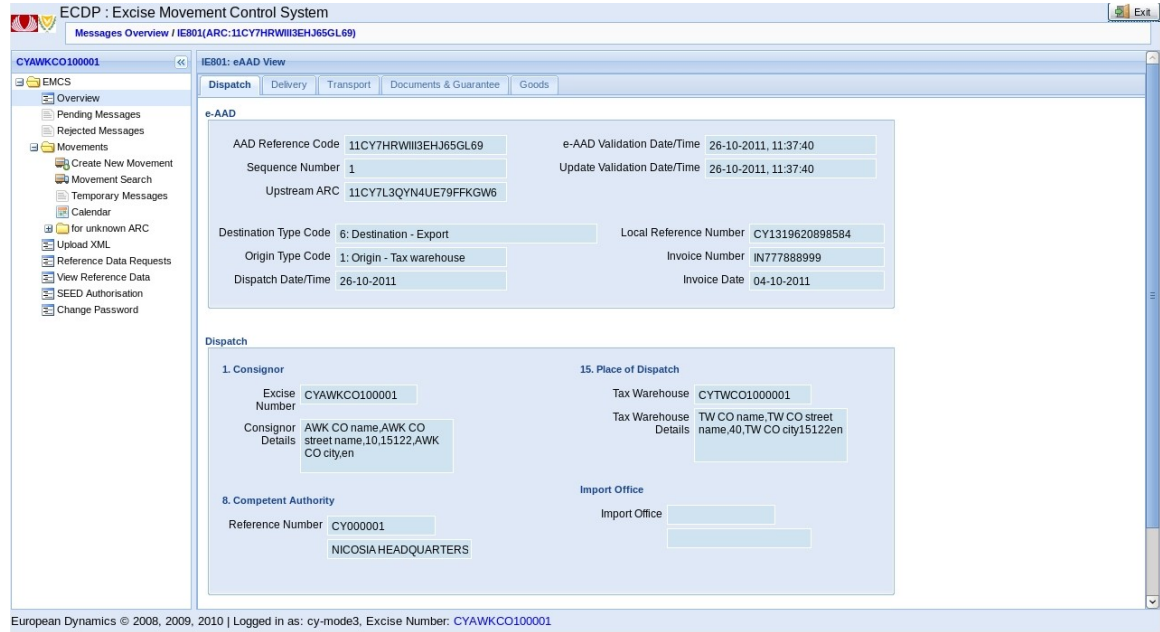

Figure 10 Screen View Message IE801

2.6 Submission of an IE815 Message (Creation of New Movement)

2.6.1 Create New Movement – Step 1

To start with, user should complete a series of basic selections.

All steps followed depend upon the completion of these options. This means that you can not go back to Step 1 if you are already at Step 2.

If you wish to change the options completed in Step 1 user should re-submit the application.

Fill in the fields

- *Submission Message Type*
 - 1: Standard submission
 - 2: Submission for export (local clearance)
- *Destination Type Code*
 - 1: Destination - Tax warehouse
 - 2: Destination - Registered consignee
 - 3: Destination - Temporary registered consignee
 - 4: Destination - Direct delivery
 - 5: Destination - Exempted organisation
 - 6: Destination - Export
 - 8: Unknown destination (consignee unknown)
- *Origin Type Code*
 - 1: Origin - Tax warehouse
 - 2: Origin - Import
- *Transport Arrangement*
 - 1: Consignor
 - 2: Consignee
 - 3: Owner of the Excise Products
 - 4: Other
- *Guarantor*
 - Consignor
 - Transporter
 - Owner of the Excise Products
 - Consignee

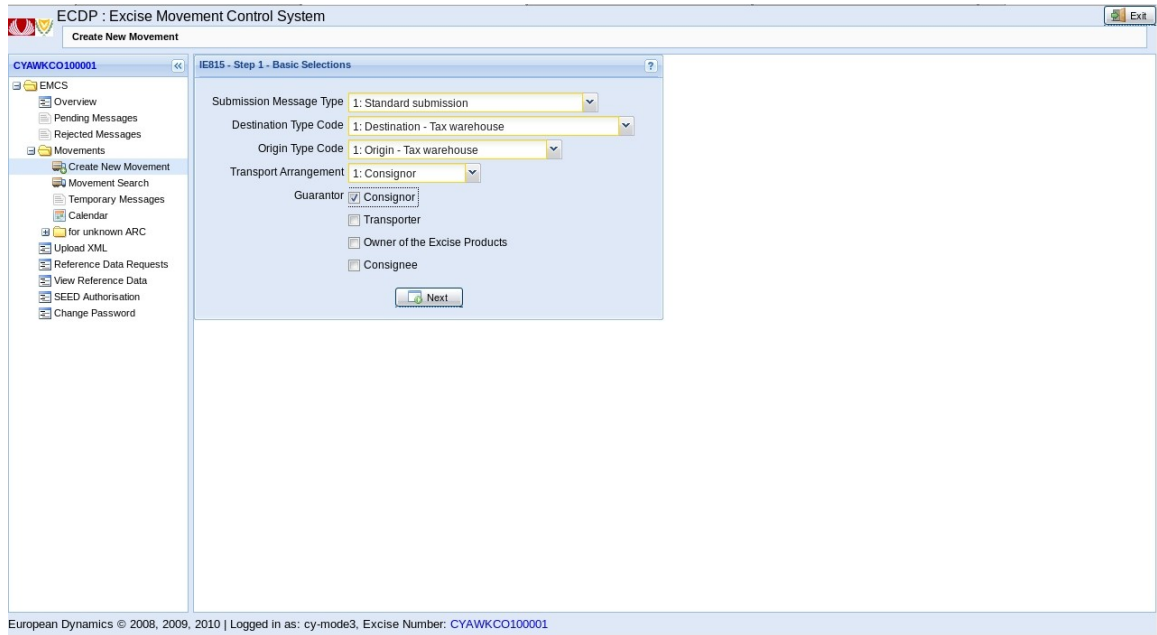

Figure 11 Screen IE815 Submission – Step 1

2.6.2 Create New Movement – Step 2

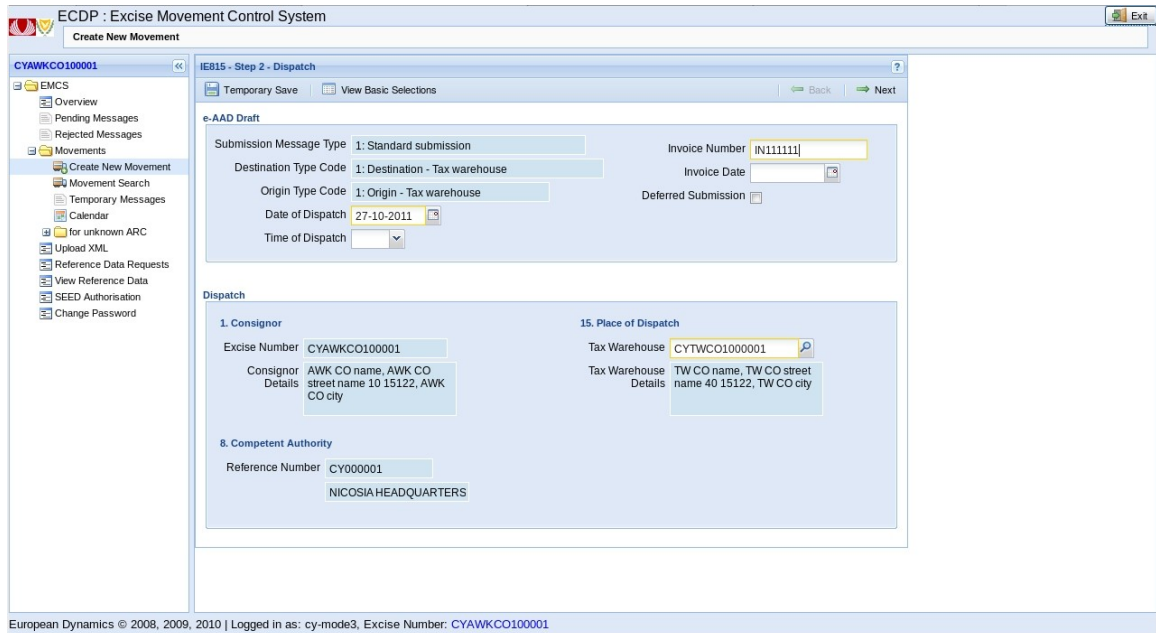

The following screen contains all the information related to the consignor. It is important to note that the details of the consignor and any additional information displayed on this screen are inherited from Step 1.

View the pre-filled fields

- *Destination Type Code*
- *Origin Type Code*
- *Consignor*
- *Excise Number*
- *Consignor Details*
- *Competent Authority*
- *Reference Number*

In step 2 fill the fields

- *Date of Dispatch*. The date of dispatch should not exceed one week from the current date.
- *Time of Dispatch*
- *Invoice Number*
- *Invoice Date*
- *Deferred Submission*
- Enter *Tax warehouse number* or click the magnifying glass icon to find it from a list

The screenshot shows the 'Create New Movement' screen in the ECDP system. The main window is titled 'IE815 - Step 2 - Dispatch'. On the left, there is a navigation menu with options like 'Overview', 'Pending Messages', 'Rejected Messages', 'Movements', and 'Create New Movement'. The main area contains several sections:

- e-AAD Draft:** Submission Message Type (1: Standard submission), Invoice Number (N111111), Destination Type Code (1: Destination - Tax warehouse), Origin Type Code (1: Origin - Tax warehouse), Date of Dispatch (27-10-2011), Time of Dispatch, Invoice Date, and Deferred Submission checkbox.
- Dispatch:**
 - 1. Consignor:** Excise Number (CYAWKCO100001), Consignor Details (AWK CO name, AWK CO street name 10 15122, AWK CO city).
 - 15. Place of Dispatch:** Tax Warehouse (CYTWCO1000001), Tax Warehouse Details (TW CO name, TW CO street name 40 15122, TW CO city).
- 8. Competent Authority:** Reference Number (CY000001), NICOSIA HEADQUARTERS.

At the bottom, it shows 'European Dynamics © 2008, 2009, 2010 | Logged in as: cy-mode3, Excise Number: CYAWKCO100001'.

Figure 12 Screen IE815 Submission - Step 2

In case of a search for Tax Warehouse

Enter optional search criteria

- *Tax Warehouse Number*
- *City*
- *Country*
- *Click Search.*

Click *OK*

Click *Tax Warehouse* from results grid

Click *Next* to proceed to step 3 of e-AAD submission

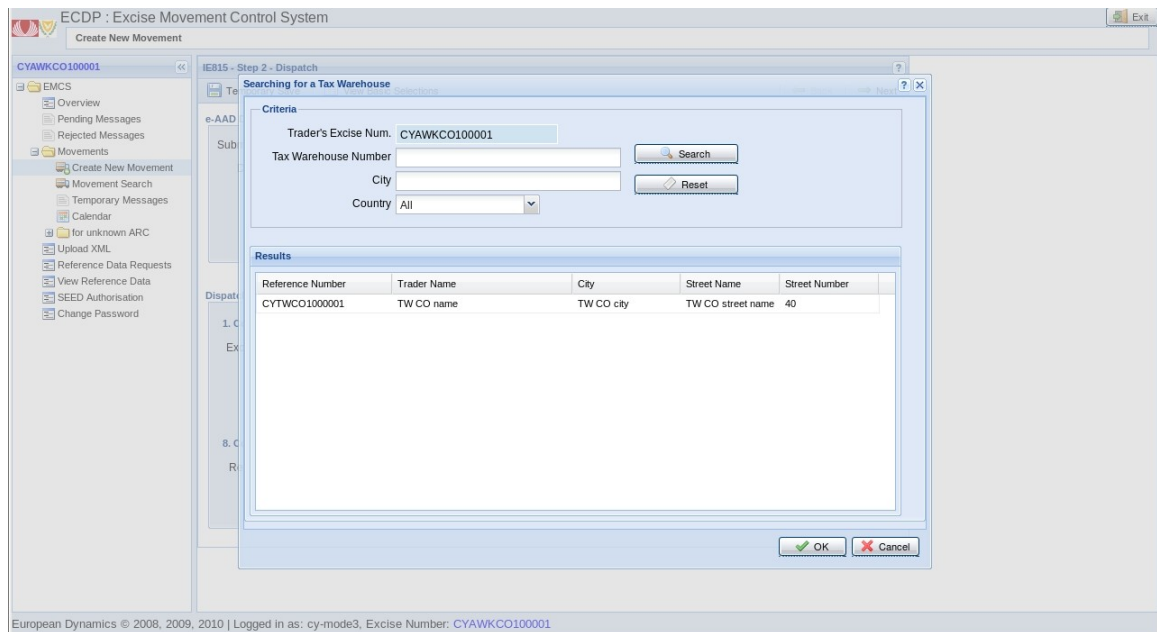

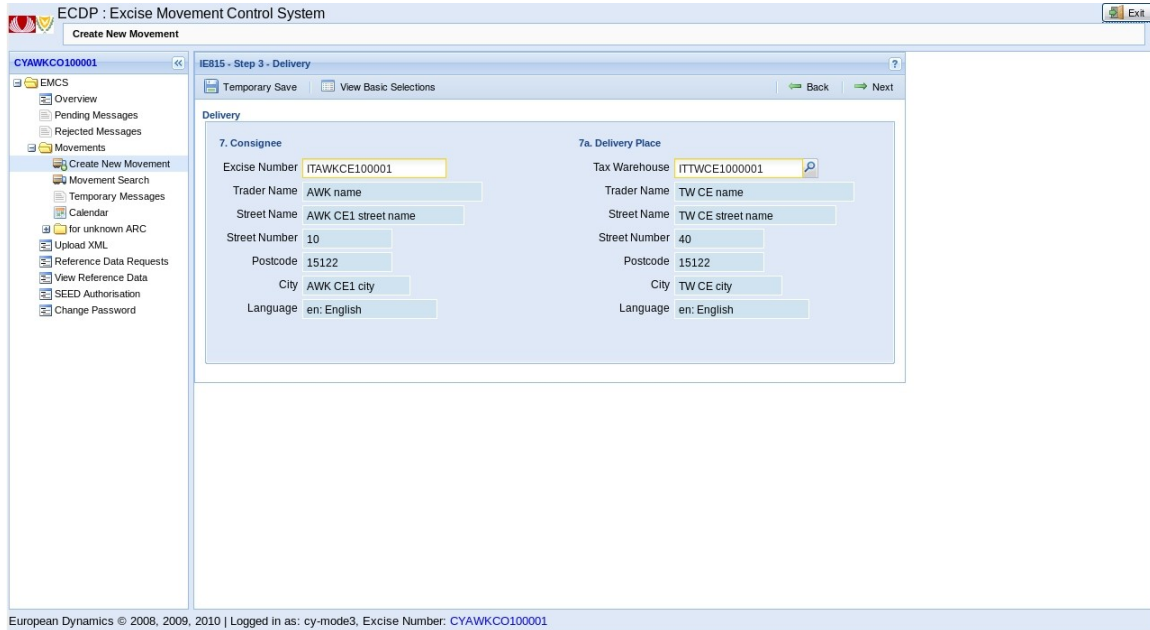

Figure 13 Screen IE815 Submission - Search Tax Warehouse

2.6.3 Create New Movement – Step 3

The following screen contains all the information related to the recipient and the place of delivery of the movement.

Fill out the Excise Number of the Consignee

ECDP : Excise Movement Control System

Click *Submit*.

Note: When selecting Back, you can go back to a previous screen.

With *Temporary Save* option you can store all data entered so far but with no submission taking place.

The display processing of the *Local Reference Number (LRN)* of created movement.

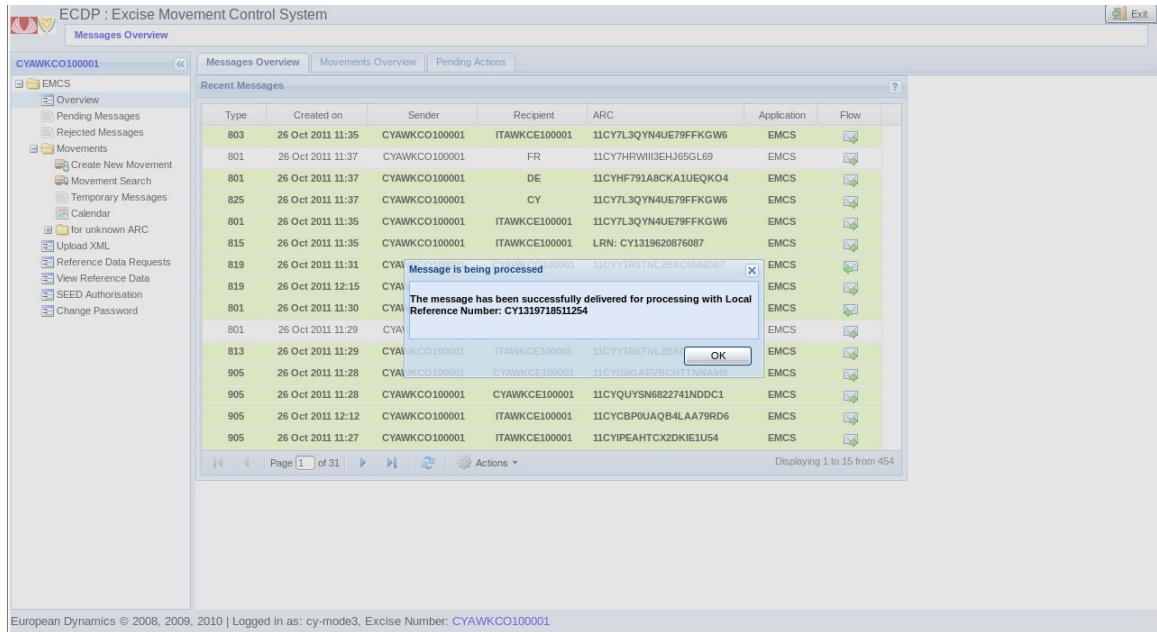

Figure 24 Screen Submission IE815 - Message Processing

2.7 Submission of an IE819 Message (Alert of Rejection of an e-AD)

Through the following screen user has the ability to submit an alert of rejection message (IE819) before the goods arrive at the destination to notify the involved actors.

This message is submitted only by the consignee and the e-AD can be alerted or rejected changing the status of the movement to *Accepted* or *Rejected* respectively.

Select *(819) Alert or Rejection* Action to proceed to the IE819 message submission

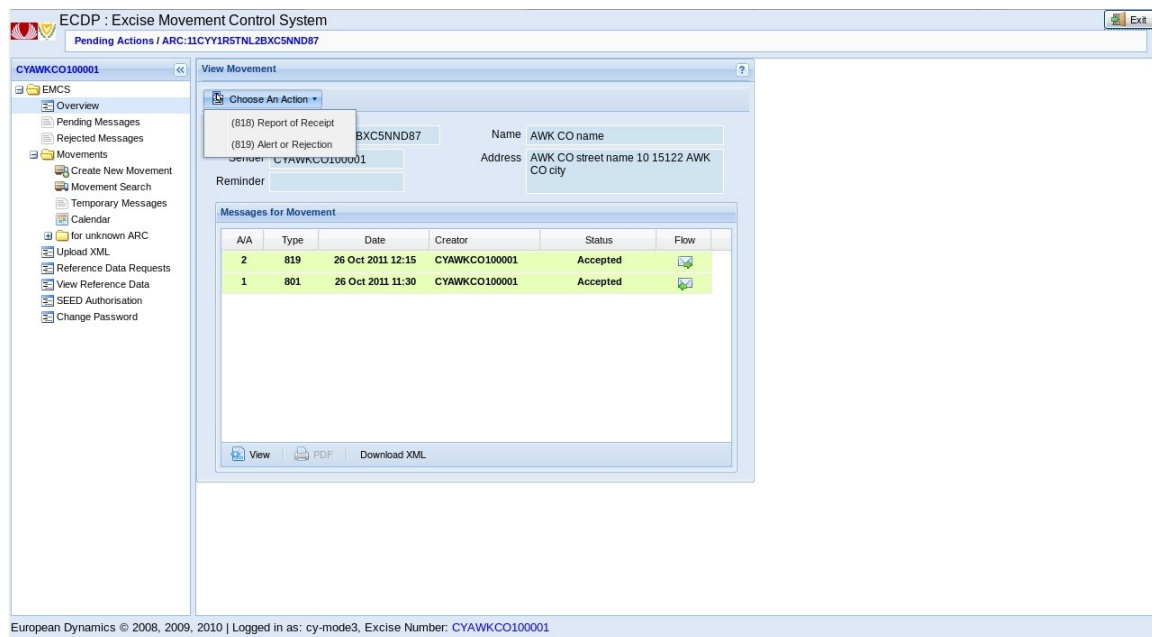

Figure 25 Screen IE819 Alert or Reject Action for Movement

Select Message Type :

- 0: Alert Message
- 1: Reject Message

The other fields are automatically filled by the movement details

- AAD Reference Code
- Sequence Number
- Trader Consignee
- Excise Number
- Details
- Destination
- Reference Number
- Details

Press *Add* button to add *Reasons code* for the alert or rejection of the e-AD.

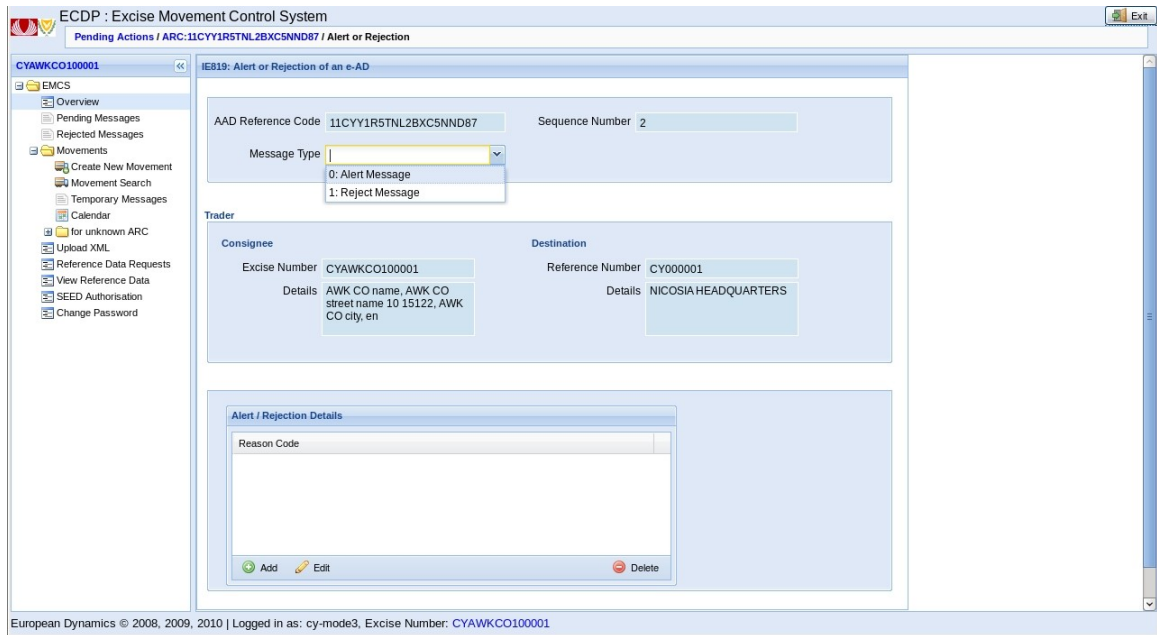

Figure 26 Screen Submission of an IE819 Message

Select the *Reason Code* for alerting or rejecting the e-AD.

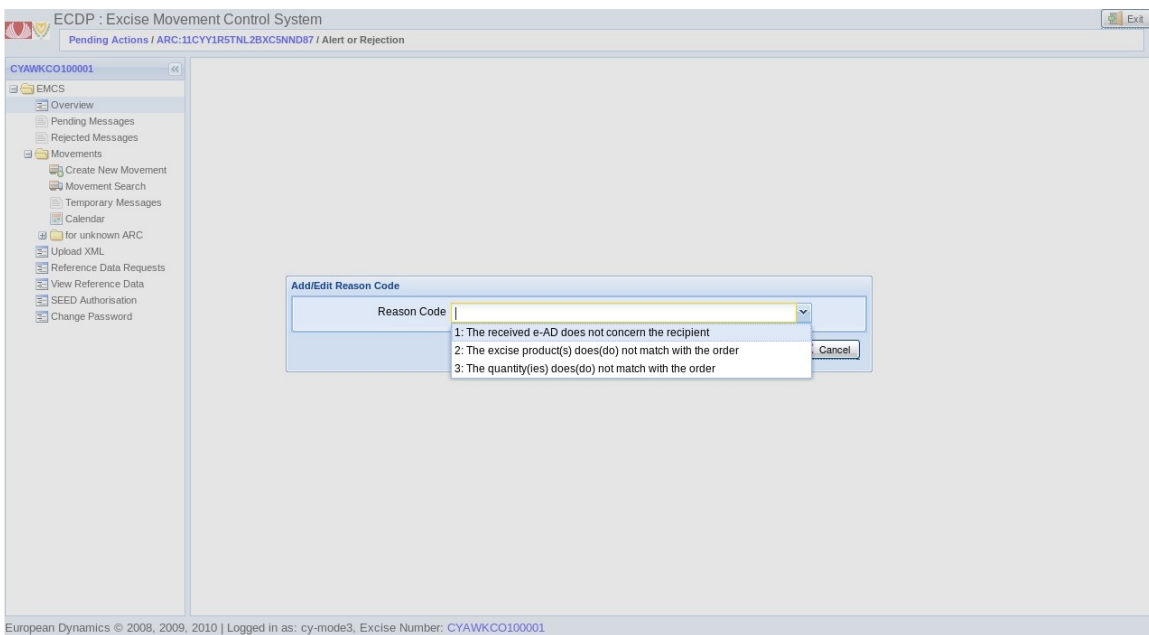

Figure 27 Screen Submission of an IE819 Message – Add/Edit Reason Code

2.8 Submission of an IE810 Message (Cancellation of an e-AD by Consignor)

The user shall submit the cancellation IE810 message traffic when the goods / property are underway to send. In this case, the sender notes that the information recorded in the opening statement is inadequate and decides to cancel it.

To cancel a movement: From *Movements Overview* click a movement and then click Movement Details. If movement status allows

- «X01» - Accepted
- «X05» - Rejected
- «X11» - Exporting

Then choice (810) *Cancel e-AAD* is active. Through the following screen a movement can be cancelled. Click action (810) *Cancellation of e-AAD*

Display Screen Submission of an IE810 Message.

 - 0: Other
 - 1: Typing error
 - 2: Commercial transaction interrupted
 - 3: Duplicate e-AAD
 - 4: The movement has not begun at the date of dispatch

Fill in optional fields

- Complementary Information and language

Click *Submit*.

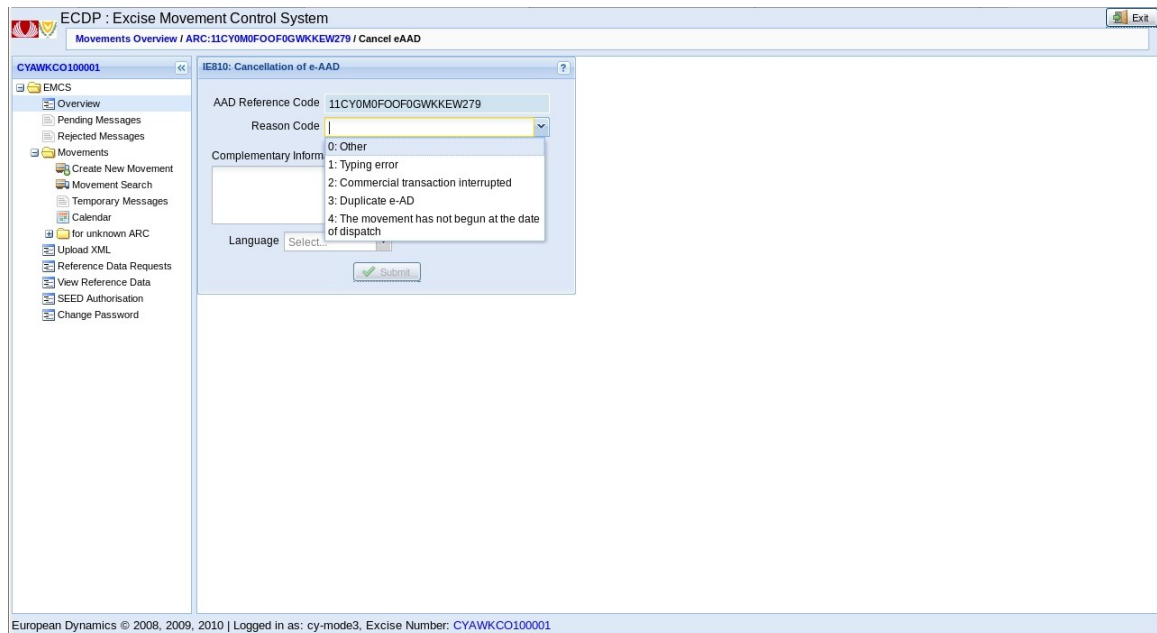

Figure 29 Screen Submission of an IE810 Message

2.9 Submission of an IE818 Message (Cancellation of Report of Receipt)

The Delivery Report is sent by the recipient of movement to notify the Consignor that the goods have reached their destination. With the arrival of the goods, the Recipient shall check for any differences in them (surplus or deficit) and records the result in Report of Receipt. Thus, the recipient can accept or reject these goods partially or wholly.

If the recipient rejects all goods, the movement does not cease to exist as the sender has to make a change of destination of movement.

In case of partial rejection of goods, the consignee is required to enter in the Report of Receipt the quantity that he rejects for each item separately.

To submit a Report of Receipt

Click the *Movement Overview* tab and click an incoming movement. If the movement status is

«X01» - Accepted

«X11» - Exporting

then action choice (818) Report of Receipt is active

Click action (818) Report of Receipt is active

Click *Submit*.

2.10 Submission of an IE813 Message (Change of Destination)

Consignor can make a change of destination of a movement at any time before and after receiving the delivery report (IE818).

Click from the tab *Movement Overview* a movement and then click *Movement Details*. If the movement status allows, namely whether

«X01» - Accepted

«X05» - Rejected

«X08» - Refused

«X10» - Partially Refused

«X11» - Exporting

then action (813) *Change of Destination* is active.

Click action (813) *Change of Destination*.

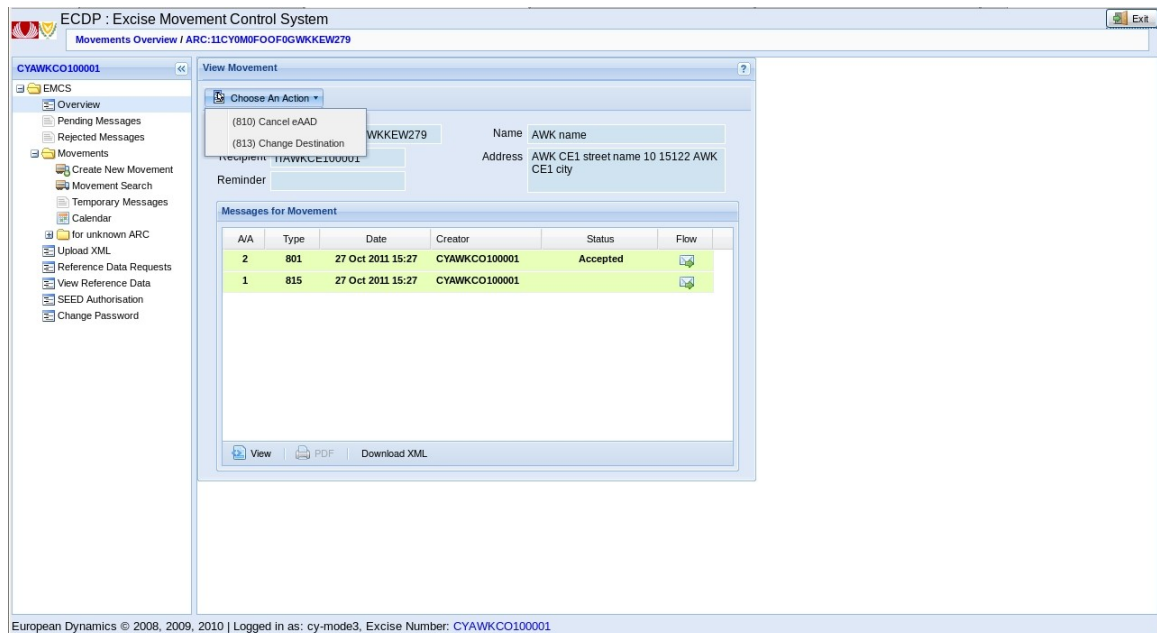

Figure 35 Screen IE813 Change of Destination- Action for Movement

On screen *IE813 – Basic Selections* fill required fields

- *Destination Type Code*
 - 1: *Destination - Tax warehouse*
 - 2: *Destination - Registered consignee*
 - 3: *Destination - Temporary registered consignee*
 - 4: *Destination - Direct delivery*
 - 6: *Destination - Export*

Fill optional fields

- *Changed Transport Arrangement*
 - 1: *Consignor*
 - 2: *Consignee*
 - 3: *Owner of goods*
 - 4: *Other*

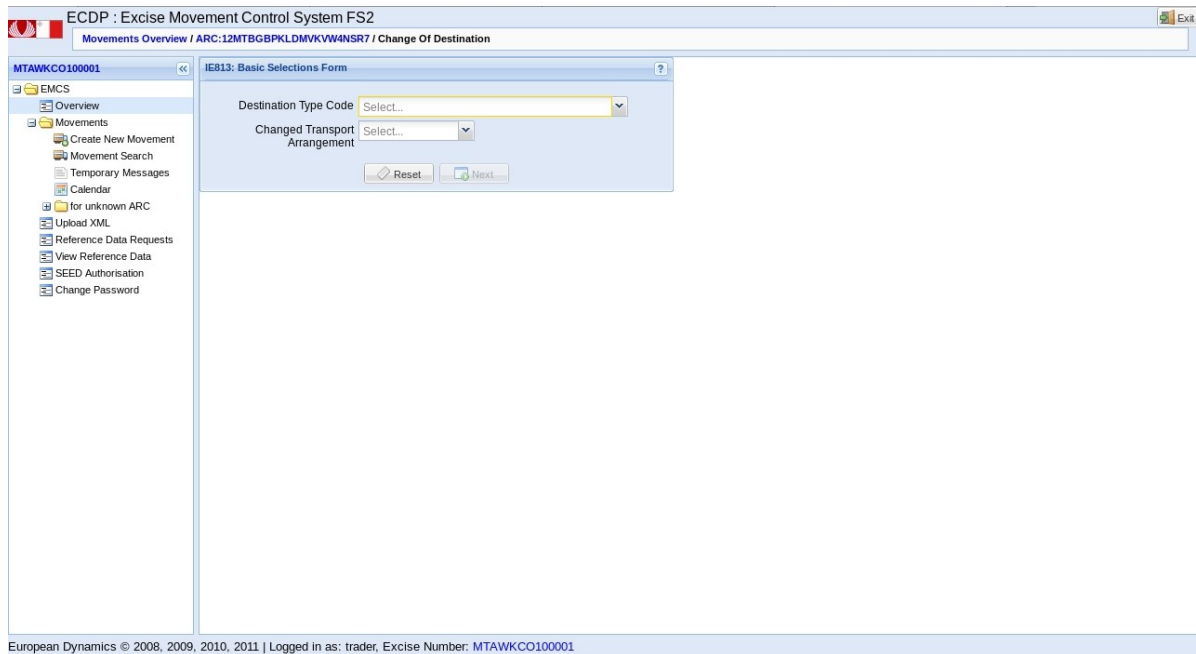

Figure 36 Screen IE813 Submission - Step 1

Click *Next*

Then the screen *Submission IE813 - Step 2 - Change Destination* appears which includes the main elements of the change of destination action.

Click *Submit*

Display Screen of Confirmation for successful Processing

2.13 Submission of an IE871 Message (Post-delivery processing)

The IE871 message can be submitted by Consignor or Consignee after the submission of the IE818 message by Consignee which declares shortages or excesses. The IE871 message may occur several times by the same actor.

Through the Movements Overview option double click into the movement for which an IE871 message need to be submitted

Choose the (871) *Explanation on Reason for Shortage* Action Option to open the Screen IE871 Explanation

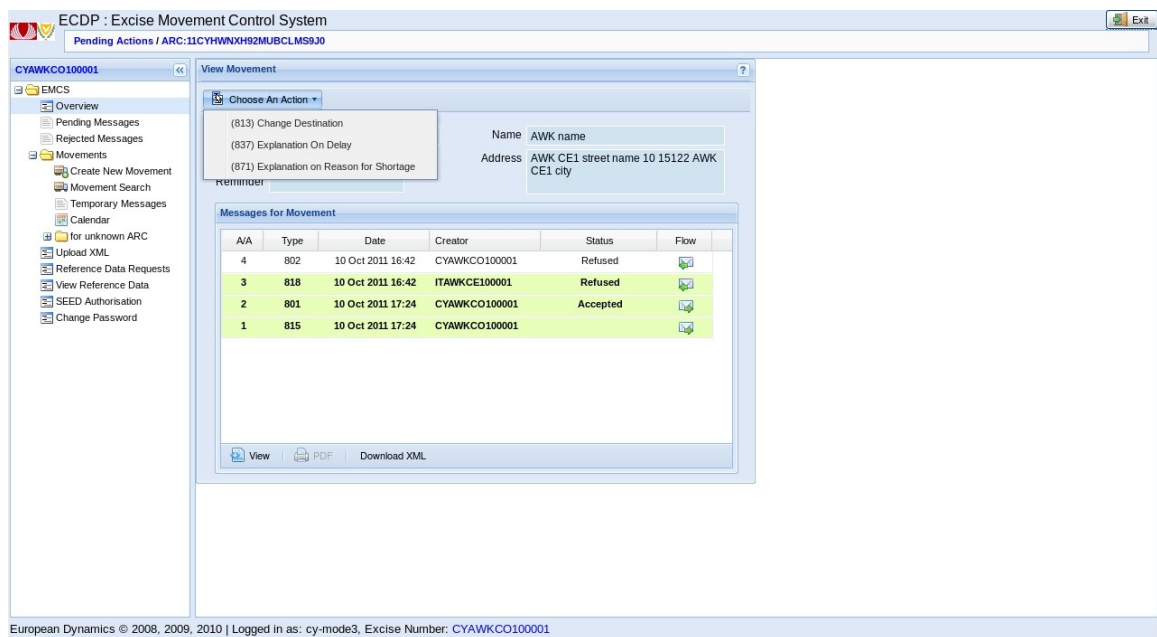

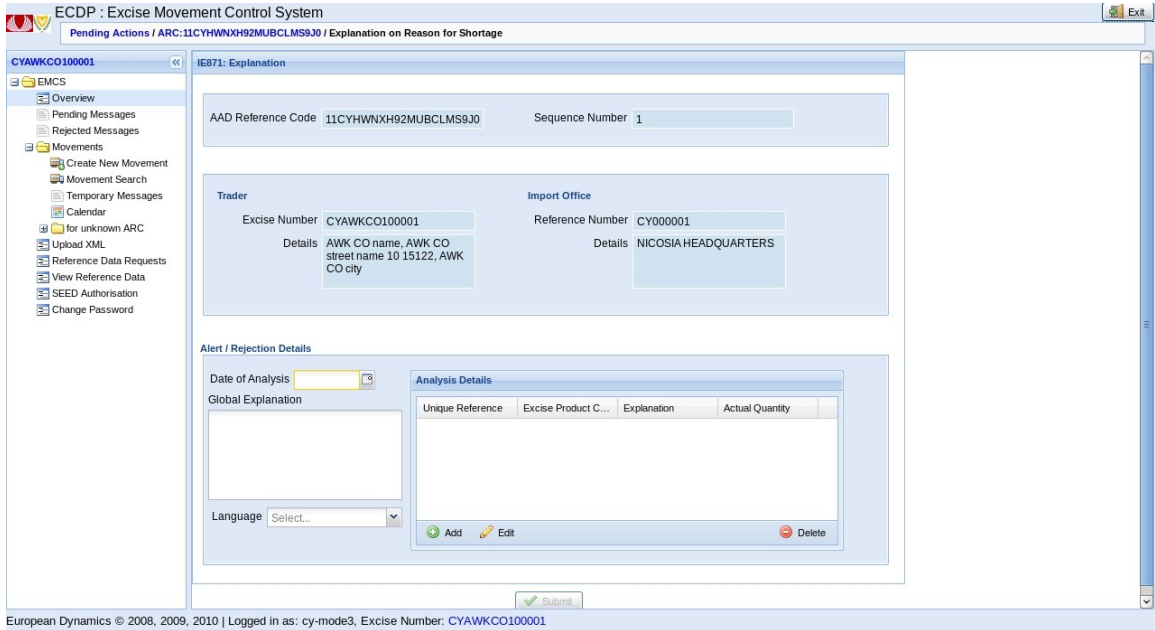

Figure 52 Screen IE871 Submission -Action for Movement

On Screen IE871 Explanation fill the required fields:

- *Date of Analysis*
- *Global Explanation and Language*

Fields:

- *Excise Number and Details*
- *Reference Number and Details* are automatically filled by the user

The screenshot shows the 'IE871: Explanation' screen in the ECDP system. The interface includes a left-hand navigation menu with options like 'Overview', 'Pending Messages', 'Rejected Messages', 'Movements', and 'Alert / Rejection Details'. The main content area is divided into several sections: 'AAD Reference Code' and 'Sequence Number' at the top; 'Trader' and 'Import Office' details in the middle; and 'Alert / Rejection Details' at the bottom, which contains a 'Date of Analysis' field, a 'Global Explanation' text area, and an 'Analysis Details' table. The table has columns for 'Unique Reference', 'Excise Product C...', 'Explanation', and 'Actual Quantity'. There are also 'Add', 'Edit', and 'Delete' buttons at the bottom of the table. The footer of the window shows the copyright information and the user's login details.

Figure 53 Screen IE871 Submission

Click *Add* to open the Screen IE871 Explanation – Analysis Details

On Screen IE871 Explanation – Analysis Details user is able to fill explanation reasons per each good item.

Furthermore he is able to *View Goods & Package Details* of the Good Item as it is shown on Screen IE871 Explanation – Analysis Details – *View Goods and Package Details*.

The *OK* button is active when a good item is selected in the grid Goods Summary

Fill into the optional *fields Explanation and Language and Actual Quantity*.

The fields *Unique Reference* and *Excise Product Code* are automatically filled after selecting a good item from the Goods Summary grid.

Figure 58 Screen Generation of an IE802 Message

2.16 Generation of IE802 - TIM_CHS Timer (Reminder at Expiry of Time Limit for Change of Destination)

The *IE802-TIM_CHS* Timer is automatically generated by the system and its purpose is to remind Consignor of the specific movement to proceed with the *IE813* message submission. After receiving the *IE802* message Consignor is able to submit through the Movements Overview tab the *IE837 (Explanation on Delay)* message.

2.17 Generation of IE802 - TIM_FDF Timer (Reminder at Expiry of Time Limit for Update of Destination fields)

The *IE802-TIM_FDF* Timer is automatically generated by the system and its purpose is to remind Consignor of the specific movement to proceed with the *IE813* message submission. After receiving the *IE802* message Consignor is able to submit through the Movements Overview tab the *IE837 (Explanation on Delay)* message and *IE813 (Change of Destination)* message.

2.18 Temporary Messages

During submission of a new Movement (IE815) the user has the choice to save the message temporarily, rather than submitting it. This is done by choosing *Temporary Saved Messages* (from step 2 and after)

To access the cached message:

Click *Temporary Messages* in Console

Click a message in *Temporary Saved Grid*

Click *Edit* and the stored message is loaded to *New Movement* Screen

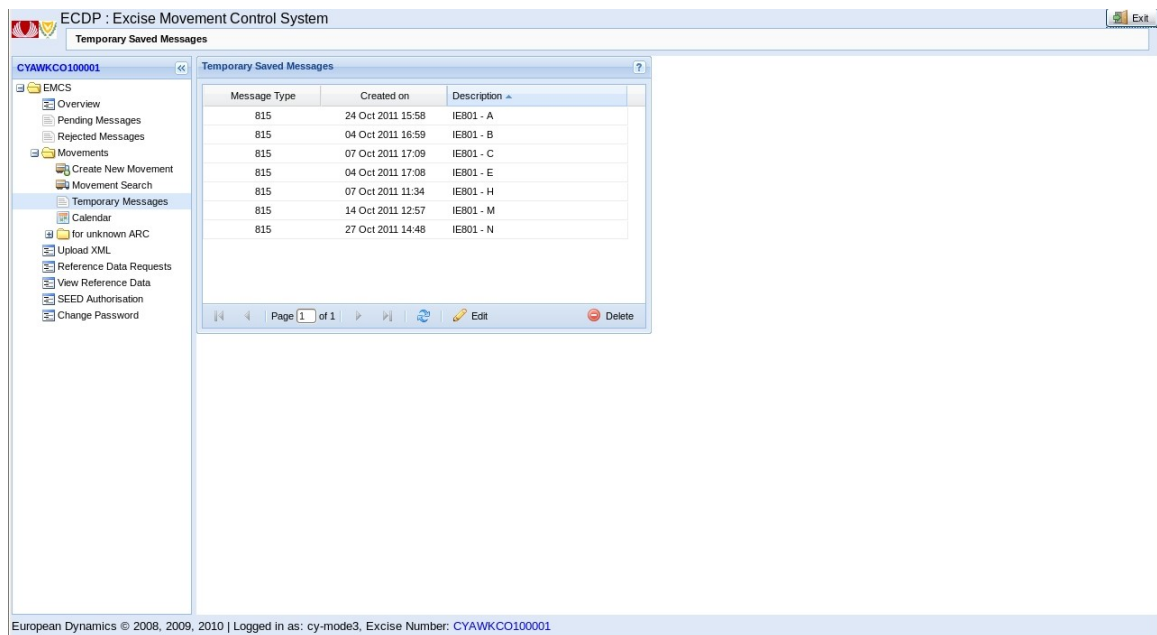

Figure 59 Screen Temporary Messages

2.19 Calendar

If you click Calendar in the console the calendar screen appears, displaying reminders of user's movement in ascending calendar order.

By selecting a date (e.g.17 September) shows the reminders of that date.

Double click to see the details of the movement.

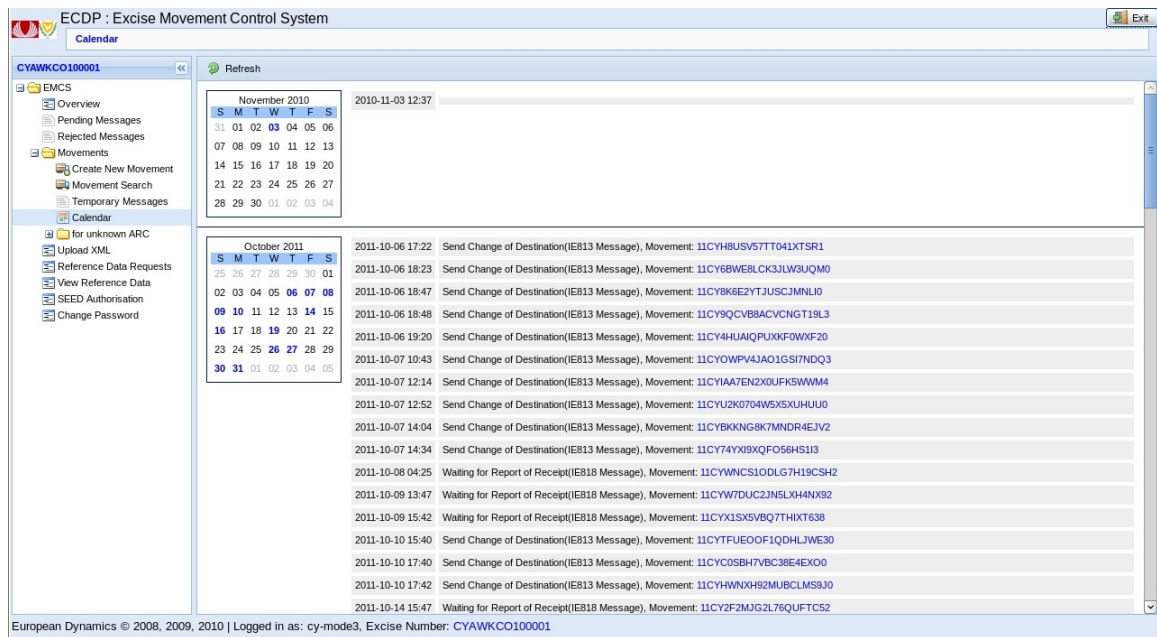

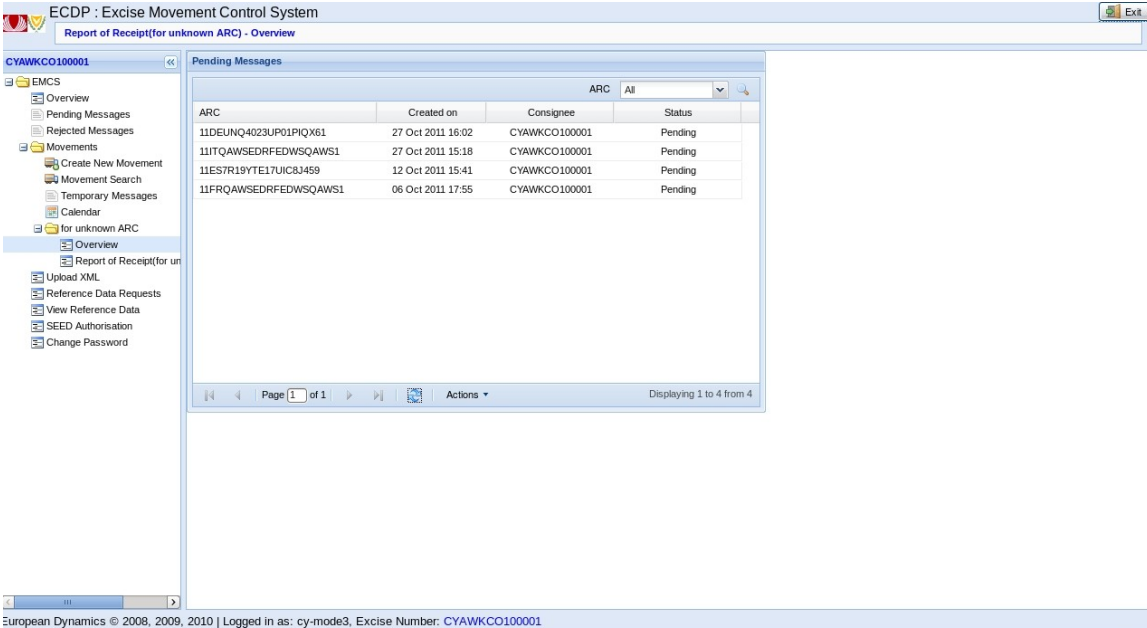

Figure 60 Screen Calendar

2.20 for unknown ARC

In case that Consignee submits an IE818 message for an *Unknown ARC* number, which means that **no** *Movement* exists for the submitted ARC then the message remains as *Pending* on *Screen For Unknown ARCs - Overview*

2.20.1 Overview

ARC	Created on	Consignee	Status
11DEUNQ4023UP01PIQX61	27 Oct 2011 16:02	CYAWKCO100001	Pending
11ITQAWSEDRFEDWSQAWS1	27 Oct 2011 15:18	CYAWKCO100001	Pending

11FRQAWSEDRFEDWSQAWS1	06 Oct 2011 17:55	CYAWKCO100001	Pending

Figure 61 Screen For Unknown ARCs - Overview

By choosing actions user has the following options:

- View: *Message Details*
- Download: *Selected messages as XML*
- Download : *All Table Data as XLS*, storing the display data in a file browser

2.20.2 Submission of an IE818 Message (for unknown ARC)

Through the Screen for *Unknown ARCs – Report of Receipt (For unknown ARC)* user is able to submit an IE818 message for an Unknown Arc number.

Note: This screen can be used only for the exceptional case of submitting a Report for Receipt (818) for an unknown ARC, namely for an 801 message that has not been received from our system. In any other case you should use the standard procedure of submitting a Report Receipt (818) through an already created movement.

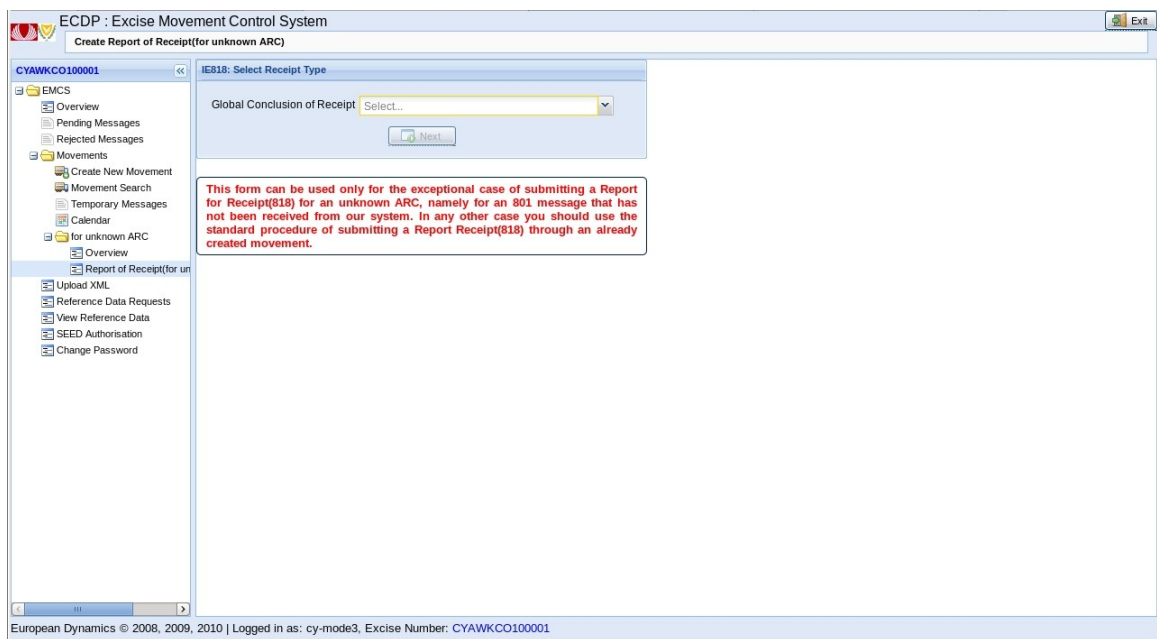

Figure 62 Screen Submission of an IE818 Message For Unknown ARC

2.21 Upload XML

Through the Screen Upload XML user is able to upload IE815, IE818, IE813, IE825, IE810, IE837 or IE871 message.

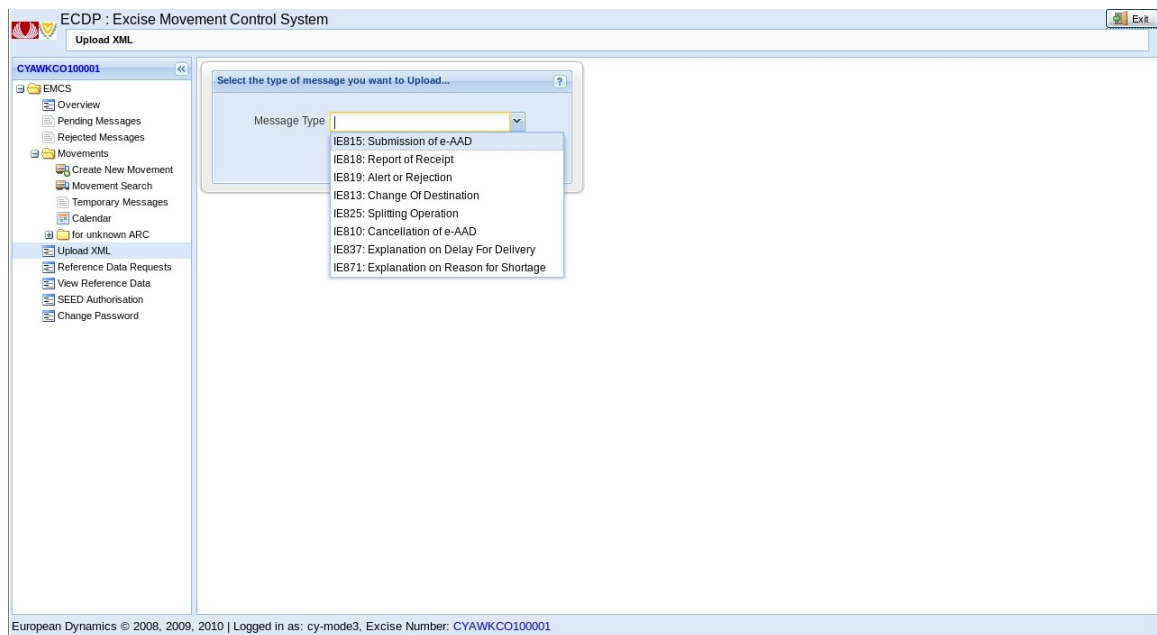

Figure 63 Upload XML file

2.22 View Reference Data

Click *View Reference Data* from Console.

Enter criteria

- *Reference Data Table*
- *Language*
- *Date (Validity)*

Click *Choose Reference Table*.

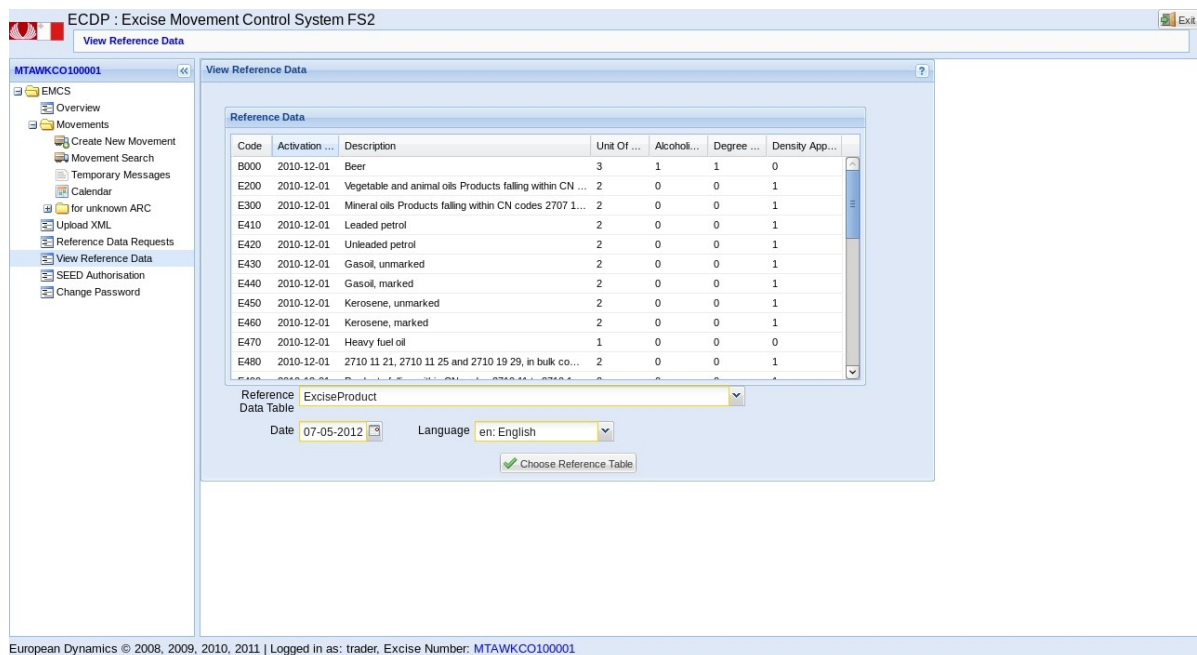

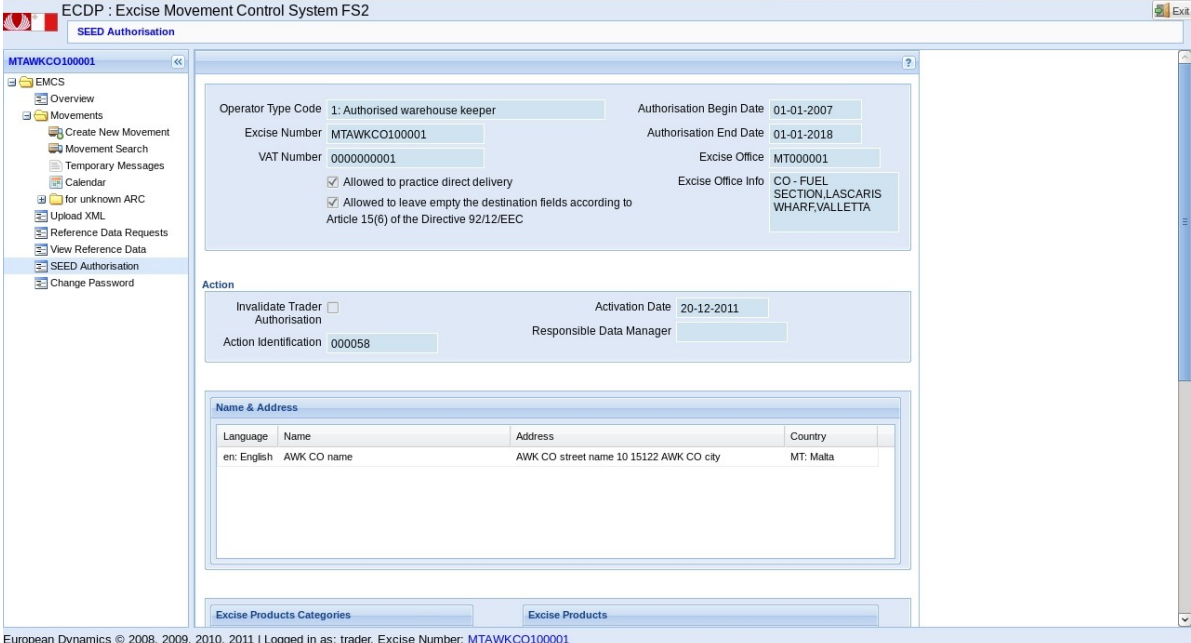

Figure 64 Screen View Reference Data

2.23 View SEED Authorisation

Click SEED Authorization in Console to display the details of the authorization of the current user.

The screenshot shows the 'SEED Authorisation' window in the ECDP system. The interface includes a left-hand navigation menu with options like 'Overview', 'Movements', and 'SEED Authorisation'. The main content area displays the following information:

- Operator Type Code:** 1: Authorised warehouse keeper
- Excise Number:** MTAWKCO100001
- VAT Number:** 000000001
- Authorisation Begin Date:** 01-01-2007
- Authorisation End Date:** 01-01-2018
- Excise Office:** MT000001
- Excise Office Info:** CO - FUEL SECTION LASCARIS WHARF, VALLETTA
- Permissions:**
 - Allowed to practice direct delivery
 - Allowed to leave empty the destination fields according to Article 15(6) of the Directive 92/12/EEC
- Action:**
 - Invalidate Trader Authorisation
 - Activation Date:** 20-12-2011
 - Action Identification:** 000058
 - Responsible Data Manager:** [Empty field]
- Name & Address:**

Language	Name	Address	Country
en: English	AWK CO name	AWK CO street name 10 15122 AWK CO city	MT: Malta

At the bottom of the window, there are buttons for 'Excise Products Categories' and 'Excise Products'. The footer of the application window reads: 'European Dynamics © 2008, 2009, 2010, 2011 | Logged in as: trader, Excise Number: MTAWKCO100001'.
