#### 1. BACKGROUND

The European Defence Agency was established on 12 July 2004, and is governed by Council Decision (CFSP) 2015/1835 defining the statute, seat and operational rules of the European Defence Agency. The Agency has its headquarters in Brussels.

The main task of EDA is to support the Council and the Member States in their effort to improve the Union's defence capabilities in the field of crisis management and to sustain the Common Security and Defence Policy (CSDP) as it currently stands and as it develops in the future.

The Agency is structured into four directorates. The Corporate Services Directorate (CSD) and three operational directorates: Industry, Synergies and Enablers (ISE); Capability, Armament & Planning (CAP); Research, Technology and Innovation (RTI).

#### 2. THE AGENCY'S WAY OF WORKING

The Agency is an "outward-facing" organisation, constantly interacting with its shareholders, the participating Member States, as well as with a wide range of stakeholders. It works in an integrated way, with multi-disciplinary teams representing all of the Agency's functional areas, to realise its objectives. Its business processes are flexible and oriented towards achieving results. Staff at all levels need to demonstrate the corresponding qualities of commitment, flexibility, innovation, and team-working; to work effectively with shareholders and stakeholder groups, formal and informal; and to operate without the need for detailed direction.

### 3. THE INDUSTRY, SYNERGIES AND ENABLERS DIRECTORATE (ISE)

The Industry Synergies & Enablers (ISE) Directorate supports a range of activities critical to collaborative defence capability development in Europe.

On top of leading the work on identifying together with Member States' Key Strategic Activities (KSA) at EU level, the ISE Directorate is responsible for the effective engagement with industry across the Agency's activities and in support of related priorities set by Member States.

The ISE Directorate facilitates work to address the implications of EU legislation and policies for the defence sector: REACH, procurement, funding instruments and the analysis of developments influencing governmental and industrial stakeholders.

The Directorate is responsible for activities on critical enablers to support defence cooperation and enhance interoperability: military airworthiness, standardisation and certification, defence test & evaluation and education and training. The Directorate provides support to CSDP military and civilian operations and missions and EU Battlegroups.

The Directorate facilitates the coordination of military views from and in support of Member States and the relevant international military organisations in the framework of Single European Sky (SES) and acts as the interface with the EU institutions and related bodies. In the wider context of military aviation, the Directorate supports Member States in their efforts to enable RPAS integration in non-segregated airspace and in harmonising military aviation safety issues using the Total System Approach to Military Aviation.

The ISE Directorate comprises four Units:

- The Industry Strategy & EU Policies (ISP) Unit: engagement of industry in the activities of the Agency, determination of Key Strategic Activities at EU level, defence aspects of EU policies varying from legislation (REACH, procurement) to funding instruments
- The Critical Enablers (CRE) Unit: support defence cooperation and enhance interoperability through the identification, development and maintenance of harmonized safety, certification and standardisation requirements, references to the best practice standards and networking of Defence Test & Evaluation capabilities in all military domains
- The Single European Sky (SES) Unit: facilitation and coordination of military views in the framework of SES; interface with the EU institutions and related bodies to ensure that Military Aviation will continue to provide and further improve effective security and defence in Europe in the changing context of the civil aviation sector
- The Operations, Training & Exercises (OTE) Unit: promotion of the use in CSDP operations of all relevant EDA projects & programmes; development and management of contracted solutions to support CSDP operations and Member States; initiation, development and management of training and exercise activities for rotary and fixed-wing aircraft, including RPAS, with a view to transfer these activities to Member States when mature.
